Thereafter, the Grievance Officer shall take up the matter with the Director (A) for resolving unaddressed grievances. The status of all grievances shall be appraised to Director General regularly.

8. Grievance Redress Mechanism Design & Implementation Process:

This section describes the step by step process for implementing the GRM:

Step: 1- Design of GRM:

All the Grievances are first received by designated Grievance Officers of the respective Institutes of NPTI by Post / Grievance Box. All the grievances are categorized as per criteria defined, level of responsibility for redress and timeline for redress for each level. The details of complainant, complaint description and any other information provided by the complainant are noted. Thereafter, the grievance is forwarded to the concerned department for redressal and the status is informed to the head of the Institute. All the Grievance Officers of NPTI have to submit a status report of grievances to the Grievance Officer in NPTI Corporate Office by 7th of every month for appraisal of Director General. All Grievances which remain unaddressed are taken up by the Grievance Officer with the respective departments and the Director General is appraised of the status.

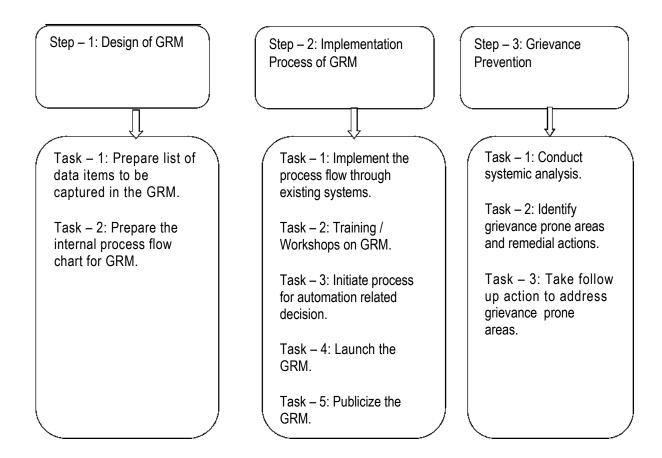

Step: 2- Implementation of GRM:

The Grievance Officer ensures that the Grievance Officers are nominated as each Institute of NPTI. These Grievance Officer are responsible for implementing the process as documented above and ensure that they are aware and trained in respect of their role in implementation of the process flow. They shall also conduct a publicity campaign to make all stakeholders aware of the GRM in alignment with the process flow in the GRM that are actually working as in above task. The basic information regarding GRM is also made available through the citizen charter.

Step: 3- Grievance Prevention:

All the grievances are analyzed for finding the root cause using the information on grievance description and subsequent redress provided to the complainant. The most frequent types of grievance and the most frequent cause behind the grievance are identified and remedial action is taken for modification of citizen's charter, the service delivery system and / or the GRM need/s to be modified in order to prevent the root causes from recurring. They identified remedial actions are assigned to appropriate personnel depending on the nature of action which could range localize process improvements to apex level policy changes. Localized process improvements are implemented quickly in a time bound manner with clear responsibilities to appropriate functionaries. Every quarter, results of the previous quarter's analysis is reviewed to ensure that there is no backlog in the localized process improvements.
